Professional Summary

Motivated and detail-oriented Junior Full-Stack Web Developer with 1.5+ years of hands-on experience building scalable web applications using React.js, Next.js, Laravel, and MySQL. Strong knowledge of RESTful APIs, real-time communication with WebSockets, authentication systems, and modern UI design. Experienced in both solo and team projects, focused on writing clean, maintainable, and efficient code. Eager to contribute to innovative software teams and grow within a dynamic development environment.

Education

École Supérieure en Informatique (ESI Sidi Bel Abbès)   2022 – Expected 2026
Bachelor of Computer Science — Focus: Software Engineering and Web Technologies

Relevant Coursework: Web Development, Databases, Distributed Systems, Network Fundamentals

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Design
Backend: Laravel, PHP, MySQL, REST APIs, Laravel Filament, Laravel Reverb, WebSockets
Tools: Git & GitHub, Vercel, Postman, Mailtrap, Docker (basic), Linux CLI
Concepts: MVC Architecture, Authentication (JWT, Sessions), Real-time Communication, API Integration, Deployment

Key Projects

Real-Time AI Chatbot Platform   2024
Laravel, Laravel Reverb, React.js, MySQL, DeepSeek API, WebSockets
GitHub: Frontend — Backend

- Built a real-time chatbot using Laravel Reverb and DeepSeek API to enable intelligent, live interactions.
- Implemented WebSockets for persistent, low-latency bidirectional communication between client and server.
- Developed user authentication, message persistence, and chat history functionality with MySQL database.
- Created responsive frontend interface with React.js, handling real-time state management and WebSocket connections.

Multi-Vendor E-Commerce Platform   2024
Laravel, Laravel Filament, Spatie, Next.js, MySQL
GitHub: Frontend — Backend

- Developed a marketplace platform supporting vendor registration, product management, and order processing.
- Designed comprehensive admin panel using Laravel Filament for vendor management, analytics, and system oversight.
- Integrated Spatie packages for role-based permissions, managing access control for admins, vendors, and customers.
- Built RESTful API backend with Laravel, handling product CRUD operations and inventory management.
- Created dynamic frontend using Next.js with server-side rendering for improved SEO and performance.

Movie Discovery Web Application   2023
Next.js, IMDB API, Tailwind CSS, React Hooks
Live Demo: moviedz-abidmo07s-projects.vercel.app

- Created a responsive movie search and filtering application integrating IMDB API for real-time movie data.
- Implemented advanced search functionality with filtering options (genre, rating, year) and pagination.
- Optimized performance using Next.js features including image optimization and lazy loading.
- Deployed to Vercel with continuous integration and automatic deployment workflows.

Real-Time Chat Application   2023
Next.js, Supabase, PostgreSQL, Real-time Subscriptions
Live Demo: real-time-chatapp-chi.vercel.app

- Built a real-time messaging platform using Supabase for backend infrastructure and real-time database subscriptions.
- Implemented secure user authentication with Supabase Auth and row-level security policies.
- Developed instant message synchronization across multiple clients using Supabase real-time listeners.
- Created intuitive user interface with message threading, online status indicators, and typing indicators.

Languages & Interests

Languages: Arabic (Native), French (B1–B2), English (B1–B2)
Interests: Web Development, AI Tools Integration, Open Source, Continuous Learning, Team Collaboration
